PROJECTS

2022-2023 — **WATER QUALITY PREDICTION USING MACHINE LEARNING**

The proposed technique involves constructing a machine learning model to assess water quality, utilizing data mining to process vast amounts of data related to water qualities. Proper treatment of water can significantly improve its quality, potentially saving lives.

2021-2022 — **BLOOD DONATION SYTEM USING WEB TECHNOLOGIES**

The project involves donating blood through a web portal, allowing users to book a slot near a nearby blood bank. In case of an emergency, individuals can also register for blood at the nearest bank.

EDUCATION

2020-2023 — **Bachelor of Computer Science.**
Vellore Institute of University
CGPA: 8.29

2018-2020 — **Higher Secondary**
Don Bosco Matric Higher Secondary School
Percentage: 64%

2017-2018 — **SSLC**
Don Bosco Matric Higher Secondary School
Percentage: 79%
